### **BANNING OF MOTORBIKES IS NECESSARY IN THE HOUSING AREAS**

Motorbikes are a nuisance and a cause for great distress. Even though motorbikes are considered as the most convenient from of transportation, I think they are a hazard to humans, animals, as well as the environment. I think motorbikes should be banned in housing areas due to the following reasons: cause of unreasonable amount of noise, air pollution, diseases, and accidents.

First of all, I would like to point out that motorbike are major contributor to the pollution in the world. Research has shown that motorbikes emit a deadly gas that is dangerous for environment. Consequently, long-term emission of gas from motorbikes is a major contributor of global warming (science daily).

Secondly, according to report from BBC News Channel, motorbikes are also responsible for causing diseases such as bronchitis, cancer, and are a major trigger of asthma and high blood pressure. Some of the diseases are so ghastly that they can kill people (BBC News ,2009).

Furthermore, motorbikes create so much noise. There is "Vroom Vroom" noise every where. It is extremely difficult to sleep parents with infants find it extremely challenging. The moment their babies fall a sleep, one or other motorbike passes by and the baby wakes up. It is also arduous for children to cocentrate on their homework. Experts are of opinion that if there is extreme noise, It can lead to deafness and lack of cocentration in children and adults (field,1993).

Finally motorbikes are responsible for horrible accidents. In some cases there are deaths. Motorbikes riders go so fast that they are unable to stop on time thus they end up hitting other people or animals. Many a time lot of animals are trampled and found death and road. Motorbikes are known to be the biggest killers on road (field,1993).

In conclusion, from the argumants above, I strongly believe that motorbikes should be banned from housing areas.

## Task 2

Rearrange the text below into a good text

1. Your answer:

.....

Number 1

Firstly, because a smoker inhales a substance which contains 43 carcinogenic compounds. What is carcinogen? It is a compound which causes cancer.

Number 2

Secondly, a smoker also inhales 400 other toxins including nicotine and tar. Nicotine leads to smoking addiction. Tar clogs the lungs and inhibits the body's capacity to breathe, it causes lung and throat cancer, heart disease, emphysema, bronchitis, and lung disorders.

Number 3

Until now there are still many people that keep smoking. Although I think all of us know that smoking is very dangerous for health. Why?

Number 4

Thirdly, people who don't smoke also suffer the effects of passive smoking. Especially if they live with a smoker. The dangers of passive smoking is particles from smoke in the air are smaller than in smoke drawn directly from a cigarette, so it can penetrate deeper into the lungs if we inhale it.

From those reasons, we can conclude that smoking is very dangerous for our health.

### 1. PENILAIAN PENGETAHUAN

Task 1 : Jawaban benar 10 x 10 poin = 100

Task 2 :

No 1.

- berkelompok dapat menyusun teks dengan benar dan tepat : 25
- berkelompok dapat menyusun teks dengan hampir benar dan tepat (terdapat satu kesalahan menyusun): 20
- berkelompok dapat menyusun teks dengan hampir benar dan tepat (terdapat dua kesalahan menyusun): 15
- berkelompok dapat menyusun teks dengan hampir benar dan tepat (terdapat tiga kesalahan menyusun): 10

No 2,3,dan 4

Jawaban benar 3x 25 poin = 75 total score (25+75=100)

 **Rumus perhitungan nilai , sebagai berikut :**

$$\frac{\text{Jumlah skor yang diperoleh}}{\text{maksimal/ideal}} \times 100 \text{ Skor}$$

 **Keterangan:**

- *Jumlah skor yang diperoleh* adalah jumlah skor yang diperoleh dari kriteria/ kategori ke-1 sampai dengan ke-4
- *Skor maksimal/ideal* adalah hasil perkalian skor tertinggi (4) dengan jumlah kriteria yang ditetapkan (ada 4 kriteria). Jadi skor maksimal/ideal=  $4 \times 4 = 16$
- Sehingga perhitungan nilai akhir maksimal adalah :  $(16/16) \times 100 = 100$
