Recount Text Biography 5
Picasso was one of the most outstanding and important artists of the 1900's. He is best known for his paintings. Almost every style in modern art is represented in Picasso's works.
Picasso was born in 1881 in Malaga, Spain as the son of an art teacher. He studied painting from his father and his college level course of study at the academy of arts in Madrid.
From about 1895 to 1901, he painted realistic works in a traditional style. He, then, entered what was called the Blue Period. During this time, he only used shades of blue in his paintings to show the poverty he saw in Barcelona. After 1908, he entered into the style of cubism. Among his well-known cubist paintings are "Three Musicians" and "Man with a Guitar". Picasso died in Moughins, France in 1973. He was really great artist. (Taken from http://englishadmin.com/)

Recount Text Biography 8

Charles Robert Darwin was born in Shrewsbury, England, on February 12, 1809. He came from a wealthy family and never had to work. He studied medicine and theology. In 1831 he graduated from University of Cambridge with a degree of theology. He began a career as a scientist quite by chance. On December 27,1831, 22 years old Charles Darwin joined the crew of the HMS Beagle as a naturalist. The five years expedition collected hydrographic, geologic, and meteorological data from South America and many other regions around the world. Darwin's own observation on this voyage led to his theory of natural selection.

Charles Darwin was greatly influenced by the geologist Adam Sedgwick and naturalist John Henslow in his development of the theory of natural selection, which was to become the foundation concept supporting the theory of evolution. Darwin's theory holds that environmental effects lead to varying degrees of reproductive success in individuals and groups of organisms. Natural selection tends to promote adaptation in organisms when necessary for survival. This revolutionary theory was published in 1859 in Darwin's now famous On the Origin of Species by Means of Natural Selection. (*Taken from http://englishadmin.com/*)
