## LEMBAR KERJA PESERTA DIDIK

❖ Activity One

*Read the text about Aloe vera below, then complete the following table with the information from the text.*

### **Aloe vera**

*Aloe vera is a herb with succulent leaves that are arranged in a rosette. The leaves are grey to green and sometimes have white spots on their surfaces. They have sharp, pinkish spines along their edges and are the source of the colourless gel found in many commercial and medicinal products. Aloe vera has yellow, tube-like flowers that cluster on a stem.*

**A. Beauty and cosmetics**

*The gel from the leaves of Aloe vera is a common ingredient in many beauty products as it hydrates and soothes hair and skin.*

**B. Food and drink**

*The gel from the leaves of Aloe vera is consumed as a juice or tonic that helps aid digestion.*

**C. Health**

*The Aloe vera gel has been used traditionally on the skin to treat psoriasis, burns, and sores caused by the Herpes simplex virus.*

*Research has shown that when taken orally, aloe gel can regulate blood glucose levels and cholesterol levels, but care should be taken when taking Aloe products.*

*The green outer layer of Aloe vera leaves secrete a bitter, yellow fluid that has traditionally been used as a laxative. However, research has shown that this could interact negatively with other medicines and herbal remedies, so should be taken with care and avoided by children and pregnant or breastfeeding women.*

## LEMBAR KERJA PESERTA DIDIK

❖ Activity One

You will read two Report texts, and answer the questions based on each of these texts.

<b>Text 1</b>	<b>Text 2</b>
<b>Guava</b>	<b>Soursop</b>
<p>Guava is a plant in the myrtle family (Myrtaceae) genus Psidium. It is native to Mexico and Central America, Northern South America, parts of the Caribbean and some parts of North Africa and also some parts of India. The guava tree is not big. It is about 33 feet with spreading branches. The bark is smooth with green or reddish-brown color. The plants branches are close to the ground. Its young twigs are soft. It has hard dark elliptic leaves. It is about 2-6 inches long and 1-2 inches wide. The flowers are white, with five petals and numerous stamens. Guava fruit, usually 2 to 4 inches long, is round or oval depending on the species. Varying between species, the skin can be any thickness, it is usually green when unripe, but become yellow or maroon when ripe. The flesh of Guava fruit is sweet or sour. The color of the flesh may be white, pink, yellow or red, with seed in the central part of the flesh. The seeds are numerous but small. In some good varieties, they are edible. Actual seed counts have ranged from 112 to 535. Guava fruit is rich with vitamins A and C, omega-3 and omega -6, gutt acids and high levels of dietary fiber.</p> <p><a href="http://demiyurfina.blogspot.com/2016/03/Report-text-guava.html">http://demiyurfina.blogspot.com/2016/03/Report-text-guava.html</a></p>	<p>Soursop is the fruit of <i>Annona muricata</i>, a broadleaf, flowering, evergreen tree native to Mexico, Cuba, Central America, the Caribbean islands of Hispaniola and Puerto Rico, and northern South America, primarily Colombia, Brazil, Peru, Ecuador, Venezuela. Soursop is also produced in all tropical parts of Africa, especially in Eastern Nigeria, The Plateau and The Democratic Republic of Congo, Southeast Asia and the Pacific. It is in the same genus, <i>Annona</i>, as cherimoya and is in the Annonaceae family.</p> <p>The flavor has been described as a combination of strawberry and pineapple, with sour citrus flavor notes contrasting with an underlying creamy flavour reminiscent of coconut or banana.</p> <p>Soursop is widely promoted (sometimes as "graviola") as an alternative cancer treatment. There is, however, no medical evidence that it is effective.</p> <p>The plant is grown for its 20–30 cm (7.9–11.8 in) long, prickly, green fruit, which can have a mass of up to 6.8 kg (15 lb), making it probably the second biggest annona after the junglesop.</p> <p>The flesh of the fruit consists of an edible, white pulp, some fiber, and a core of indigestible, black seeds. The species is the only member of its genus suitable for processing and preservation. The pulp is also used to make fruit nectar, smoothies, fruit juice drinks, as well as candies, sorbets, and ice cream flavorings.</p> <p>(Source: Wikipedia)</p>

#### ❖ Activity Three

Read the text below, and use a table of analysis similar to the one you have read in Bahan Bacaan to analyse the text.

#### **Neighbourhood**

A neighbourhood is a social community within a city, town, or village. A neighbourhood is made up of families who live near each other as neighbours. There is a lot of face-to-face interaction among them. Neighbourhoods have many benefits for the members. A strong and closely related neighbourhood is a safe environment for the children to grow up. Mothers and girls can also learn certain skills, like cooking and knitting from each other, with little or no money. There are many enjoyable neighbourhood activities, too, like sports and celebrations. Neighbourhoods also protect the families from crimes.

## LEMBAR KERJA PESERTA DIDIK

### ❖ Activity One

*Read the following text to start the lesson, then answer the questions.*

#### Koi Fish

*Koi fish is a species of carp fish with a unique color and pattern. They are originated from Eastern Asia. The name “Koi” is a Japanese word which means carp fish. Mostly, they are kept by humans in an outdoor ponds to beautify the garden.*

*Their body formed a curve in the middle which make it looks chubby, and it is similar to the other species of carp fish. They have three pairs of fin located on the bottom of their body and a long fin on top of their body. Their tail is flat and it is spread vertically. Their eyes are located on each side of the head. Their mouth is wide with thick lips around it. They can form an o-shape when they open their mouth.*

*Their skin are covered with large and colorful scales. Some of them have more than two color on their body such as white scales with black and orange spots or white scales with black and red spots. They can grow up to the size of 80 cm with the maximum weight of 14 kg. It is recorded that they can live up to 20 years.*

<http://britishcourse.com/contoh-Report-text-koi-fish.php>

*Vocabulary list:*

No.	English	Indonesian
1.	a curve	sebuah lengkungan
2.	beautify	memperindah
3.	carp fish	ikan mas
4.	Fin	sirip
5.	Grow	tumbuh
6.	originated	asal
7.	scales	sisik
8.	shape	bentuk
9.	species	spesies/ jenis
10.	spread	menyebar

Questions:

- What is the text about?
- Where are the carp fish originated from?
- How is their body?
- How can they grow up?
- What probably makes people interested to keep the Koi Fish?

### ❖ Activity Two

*Make a simple paragraph about Koi Fish based on your answer, at least 5 sentences.*

Koi Fish

.....  
.....  
.....  
.....  
.....

### ❖ Activity Three

*Here is the paragraph about school. But they are written without any punctuation. Rewrite them in good sentences.*

#### **school**

a school is a place where students go to learn today  
children in most countries must go to school for  
a number of years teachers help them to learn a  
school is headed by a principal or a headmaster at  
school students can learn skills and knowledge that  
are useful for the life now and in the future in most  
countries students learn basic subjects—science,  
music, geography, history, and languages they also  
learn extracurricular activities in indonesia, religion  
is a compulsory subject with their teachers and their  
friends students also learn to be good people who can  
differentiate between right and wrong and between  
acceptable and unacceptable behaviour
